The Consorcio Hospital General Universitario of Valencia is specialized in "Airway management", "Locoregional Blocks" and "Ventilation" in Thoracic Surgery, among others. In addition, it has a Clinical Simulation Center where you can practice many of these techniques on maniquis or simulators.

This center is accredited by the European Association of Cardiothoracic Anaesthesiology (EACTA) for training in Thoracic Anesthesia skills through a very attractive program called Thoracic Exchange Training Program.

## Programme director

### **Manuel Granell Gil**

Chief section of Anesthesiology in Consorcio Hospital General Universitario of Valencia (Spain).

Associate Professor of Anesthesiology at the University of Valencia (Spain).

[mgranellg@hotmail.com](mailto:mgranellg@hotmail.com)

# Programme

The aim is to acquire technical skills in preoperative assessment, anesthesia and postoperative care of thoracic surgery's patients including conventional thoracic surgery, video-assisted thoracoscopic surgery (VATS) and robotic surgery.

## Who is this course for?

This course is for specialists in Anesthesiology, Critical Care and Pain relief from Europe.

## Language

English or Spanish.

## Duration

The formative stay can last for 1, 2, 3 or 4 weeks, depending on the interest and availability of the interested anesthesiologists and our center (One or two weeks are the most recommended).
